Substance Abuse and Mental Health Services Administration (SAMHSA) has set mandatory guidelines for Federal Workplace Drug Testing Programs. These guidelines list 5 drugs that have become known as the SAMHSA 5.
### THE LABORATORY SERVICES DIVISION

The Laboratory Services Division of Saginaw County Department of Public Health provides drug screening services to residents and non-residents of Saginaw County. No referrals necessary.

Confidential test results for drugs of abuse are accepted in over a dozen court systems in Michigan.

**CURRENT TECHNOLOGY ALLOWS THE LABORATORY TO PROVIDE:**

- **Zero-tolerance Program**
  - Very low sensitivity informs when drugs are present at very low levels

- **Quantitative Results**
  - Positive results are reported with the quantity of drug found

- **The ability to monitor usage**
  - A rise or decline in levels may reflect the client's recent drug habit

- **Resistance to Adulteration**
  - Low sensitivity prevents adulteration from interfering with drug detection
